🚀 Prompt Engineering Progress Report Card

Morris Mwangi Gitau

Economist | Crypto & Forex | AI Enthusiast

Quantitative Performance (Score: 0–10)

Overall Average: 9.3/10

Skill Area	Score	Highlights
Clarity & Specificity	10	Precise, unambiguous prompts tailored to task and audience
Use of Real-World References	10	Strong contextual anchoring using live examples and data
Task Complexity & Multi-Step Logic	9	Multi-layered prompts addressing content, SEO, and deployment needs
Iterative Refinement & Feedback	9	Effective learning cycles and prompt evolution
Audience & Channel Adaptation	10	Custom tone, style, and structure for LinkedIn, Medium, Google, and more
Reproducibility & Testing Readiness	10	Prompt summaries for easy re-use and model deployment
Abstraction & Generalization	7	Growing ability to create reusable, robust prompt templates

Qualitative Highlights

1. Strategic Communication: I consistently deliver prompts that are clear, actionable, and aligned with end goals—whether driving investor engagement or optimizing for SEO.

2. Iterative Mindset: Each prompt builds on prior feedback, demonstrating continuous improvement and adaptability.
3. Evidence-Driven: Real-world references and results (e.g., myfxbook, LinkedIn articles) anchor outputs in credibility and transparency.
4. Audience Focus: Every output is tailored to the needs of the intended reader—investors, collaborators, or the broader tech community.
5. Deployment-Ready: I proactively consider testing, reproducibility, and scaling—ensuring prompts are not just effective, but also robust for real-world use.

What's Next?

I'm focused on advancing my skills in prompt abstraction, edge-case handling, and automation—pushing towards even greater efficiency and creative impact in the generative AI space.

Let's Connect!

If you're a recruiter, AI innovator, or business leader seeking a collaborator who blends technical skill with strategic thinking, I'm eager to connect.

Let's shape the future of AI-driven content and workflow automation together!
